

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

JPM GBP Ultra-Short Income UCITS ETF - GBP (dist)

a Share Class of JPMorgan ETFs (Ireland) ICAV – GBP Ultra-Short Income UCITS ETF

a Sub-Fund of JPMorgan ETFs (Ireland) ICAV

IE00BD9MMG79

The management company is JPMorgan Asset Management (Europe) S.à r.l.

Objectives and Investment Policy

Investment Objective: The Sub-Fund aims to provide current income while seeking to maintain a low volatility of principal.

Investment Policy: The Sub-Fund pursues an actively-managed investment strategy.

The Sub-Fund seeks to achieve its investment objective by primarily investing in investment grade, Pound Sterling-denominated, short term fixed, variable and floating rate debt securities.

The Sub-Fund will not seek to track the performance of the benchmark, rather the Sub-Fund will hold a portfolio of actively selected and managed investments. The benchmark has been included as a point of reference against which the performance of the Sub-Fund may be measured. The Sub-Fund will be managed without reference to its benchmark.

The Investment Manager allocates the Sub-Fund's assets among a range of market sectors. In buying and selling investments for the Sub-Fund, the Investment Manager looks for market sectors and individual securities that it believes will assist in delivering the Sub-Fund's investment objective by providing stable income and price appreciation.

The Sub-Fund will concentrate its investments in the banking industry and, under normal conditions, will invest more than 25% of its Net Asset Value in debt securities issued by companies which are in the banking industry. The Sub-Fund may, however, invest less than 25% of its Net Asset Value in this industry as a temporary defensive measure.

The Sub-Fund seeks to maintain a duration of one year or less. Duration is a measure of the price sensitivity of a debt security or a portfolio of debt securities to changes in relevant interest rates.

As part of its principal investment strategy and for temporary defensive purposes, any portion of the Sub-Fund's Net Asset Value may be invested in cash and cash equivalents.

The Sub-Fund may, for efficient portfolio management, use financial derivative instruments.

GBP is the base currency of the Sub-Fund.

Redemption and Dealing: Shares of the Sub-Fund are traded on one or more stock exchanges. Certain market makers and brokers may subscribe and redeem Shares directly with JPMorgan ETFs (Ireland) ICAV, and are referred to as "Authorised Participants". Other investors who are not Authorised Participants can purchase and sell Shares daily on a recognised stock exchange or over-the-counter.

Management Discretion: The Investment Manager has the discretion to buy and sell investments on behalf of the Sub-Fund within the limits of the Objective and Investment Policy.

Benchmark: The benchmark is ICE BofAML Sterling 3-Month Government Bill Index.

Distribution Policy: This Share Class will normally pay dividends.

Risk and Reward Profile

The above rating is based on the historic volatility of the simulated Net Asset Value of this Share Class over the last five years and may not be a reliable indication of the future risk profile of this Share Class.

The risk and reward category shown above is not guaranteed to remain unchanged and may change over time.

A Share Class with the lowest risk rating does not mean a risk-free investment.

Why is this Share Class in this category? This Share Class is classified in category 1 because its simulated Net Asset Value has shown very low fluctuations historically.

Other material risks:

- The value of your investment may fall as well as rise and you may get back less than you originally invested.

- To the extent that the Sub-Fund uses financial derivative instruments, the risk profile and the volatility of the Sub-Fund may increase.
- The value of debt securities may change significantly depending on economic and interest rate conditions as well as the credit worthiness of the issuer. These risks are typically increased for below investment grade debt securities which may also be subject to higher volatility and lower liquidity than investment grade debt securities.
- The credit worthiness of unrated debt securities is not measured by reference to an independent credit rating agency.
- Asset-backed, collateralised loan obligations and mortgage-backed securities may be less liquid than other securities in which the Sub-Fund will invest, subject to adverse changes to interest rates and to the risk that the payment obligations relating to the underlying assets are not met.
- The Sub-Fund may be concentrated in the banking industry and in the UK sectors, markets and/or currency. As a result, the Sub-Fund may be more volatile than more broadly diversified funds.
- Further information about risks can be found in the "Risk Information" section of the Prospectus.
