This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## JPM Equity Long-Short UCITS ETF - EUR Hedged (acc)

a Share Class of JPMorgan ETFs (Ireland) ICAV – Equity Long-Short UCITS ETF

a Sub-Fund of JPMorgan ETFs (Ireland) ICAV

IE00BDDRF148

The management company is JPMorgan Asset Management (Europe) S.à r.l.

### Objectives and Investment Policy

**Investment Objective:** The Sub-Fund aims to provide long-term total return through a portfolio of long-short equity positions aiming to capture a diversified set of equity returns.

**Investment Policy:** The Sub-Fund pursues an actively-managed strategy.

The Sub-Fund seeks to achieve its investment objective by exploiting pricing inefficiencies between global developed market equity securities by maintaining long and short positions in respect of equity securities, based on a systematic investment process. The Sub-Fund will not seek to track the performance of the benchmark, rather the Sub-Fund will hold a portfolio of actively selected and managed investments. The benchmark has been included as a point of reference against which the performance of the Sub-Fund may be measured. The Sub-Fund will be managed without reference to its benchmark.

The Investment Manager believes that it has identified through its quantitative research process (and will continue to identify) a set of investment return sources that have a low correlation to each other and to traditional markets and have distinct risk and return profiles (each a "return factor"). The Sub-Fund's investment policy involves simultaneously investing in equities (i.e. taking long positions) that the Investment Manager believes are attractive based on the relevant return factors and selling equities (i.e. taking synthetic short positions) that the Investment Manager believes are unattractive based on the relevant return factors.

The Sub-Fund's net market exposure may vary in time, however the Sub-Fund's net long positions are not expected to exceed 200% of its Net Asset Value and its net short positions are not expected to exceed -100% of its Net Asset Value. The Sub-Fund expects to maintain a total net long market exposure under normal market conditions. However, the Sub-Fund may have net long or net short exposure to one or more industry sectors, individual markets and/or currencies.

In addition, the Sub-Fund may, for efficient portfolio management and investment purposes, use financial derivative instruments.

USD is the base currency of the Sub-Fund.

This Share Class seeks to minimise the effect of currency fluctuations between the Reference Currency of the Sub-Fund (USD) and the Reference Currency of this Share Class (EUR).

**Portfolio Transaction Costs:** A consequence of this investment strategy is that the volume of transactions and, therefore, transaction costs, are material. Portfolio transaction costs are paid from the assets of the Sub-Fund. They are additional to the charges set out in the Charges section. The chart in the Past Performance section shows the Sub-Fund's performance including portfolio transaction costs.

**Redemption and Dealing:** Shares of the Sub-Fund are traded on one or more stock exchanges. Certain market makers and brokers may subscribe and redeem Shares directly with JPMorgan ETFs (Ireland) ICAV, and are referred to as "Authorised Participants". Other investors who are not Authorised Participants can purchase and sell Shares daily on a recognised stock exchange or over-the-counter.

**Management Discretion:** The Investment Manager has the discretion to buy and sell investments on behalf of the Sub-Fund within the limits of the Objective and Investment Policy.

**Benchmark:** The benchmark is ICE BofAML US 3-Month Treasury Bill Index.

**Distribution Policy:** This Share Class will not pay dividends.

### Risk and Reward Profile

Lower risk

Higher risk

Potentially lower reward

Potentially higher reward

1	2	3	4	5	6	7
---	---	---	---	---	---	---

The above rating is based on the historic volatility of the simulated Net Asset Value of this Share Class over the last five years and may not be a reliable indication of the future risk profile of this Share Class.

The risk and reward category shown above is not guaranteed to remain unchanged and may change over time.

A Share Class with the lowest risk rating does not mean a risk-free investment.

**Why is this Share Class in this category?** This Share Class is classified in category 5 because its simulated Net Asset Value has shown medium to high fluctuations historically.

#### Other material risks:

- The value of your investment may fall as well as rise and you may get back less than you originally invested.

- To the extent that the Sub-Fund uses financial derivative instruments, the risk profile and the volatility of the Sub-Fund may increase.
- There is no guarantee that the use of long and short positions will succeed in enhancing investment returns.
- The short selling of investments may be subject to changes in regulations and losses from short positions may be unlimited.
- The Sub-Fund may invest in securities issued by smaller companies, which may be less liquid, more volatile and tend to carry greater financial risk than securities issued by larger companies.
- Movements in currency exchange rates can adversely affect the return of your investment. The currency hedging used to minimise the effect of currency fluctuations may not always be successful. Investors may have exposure to currencies other than the currency of their Share Class.
- Further information about risks can be found in the "Risk Information" section of the Prospectus.

## Charges

### One-off charges taken before or after you invest
