The management company is JPMorgan Asset Management (Europe) S.à r.l.

Objectives and Investment Policy

Investment Objective: The Sub-Fund aims to provide an exposure to the performance of Euro-denominated bonds that have been issued by governments of Eurozone countries with a maturity of between one and three years.

Investment Policy: The Sub-Fund pursues a passively managed (index-tracking) strategy.

The Sub-Fund aims to track the performance of the Index as closely as possible, regardless of whether the Index level rises or falls, while seeking to minimise as far as possible the tracking error between the Sub-Fund's performance and that of the Index.

The Index consists of Euro-denominated bonds that have been issued by governments of Eurozone countries with a maturity of between one and three years.

The Sub-Fund will use the optimisation methodology to select Index Securities in order to build a representative portfolio that provides a return that is comparable to that of the Index. Consequently, the Sub-Fund will only hold a certain sub-set of the Index Securities.

The Sub-Fund may, for efficient portfolio management purposes, use financial derivative instruments.

EUR is the base currency of the Sub-Fund.

Redemption and Dealing: Shares of the Sub-Fund are traded on one or more stock exchanges. Certain market makers and brokers may subscribe and redeem Shares directly with JPMorgan ETFs (Ireland) ICAV, and are referred to as "Authorised Participants". Other investors who are not Authorised Participants can purchase and sell Shares daily on a recognised stock exchange or over-the-counter.

Index: J.P. Morgan EMU Government Bond Index 1-3 Year.

Distribution Policy: This Share Class will not pay dividends.

The above rating is based on the historic volatility of the simulated Net Asset Value of this Share Class over the last five years and may not be a reliable indication of the future risk profile of this Share Class.

The risk and reward category shown above is not guaranteed to remain unchanged and may change over time.

A Share Class with the lowest risk rating does not mean a risk-free investment.

Why is this Share Class in this category? This Share Class is classified in category 2 because its simulated Net Asset Value has shown low fluctuations historically.

Other material risks:

- The value of your investment may fall as well as rise and you may get back less than you originally invested.
- The value of debt securities may change significantly depending on economic and interest rate conditions as well as the credit worthiness of the issuer. Issuers of debt securities may fail to meet payment obligations or the credit rating of debt securities may be downgraded.
- The Sub-Fund is not expected to track the performance of the Index at all times with perfect accuracy. The Sub-Fund is, however, expected to provide investment results that, before expenses, generally correspond to the price and yield performance of the Index.
- The Sub-Fund may be concentrated geographically. As a result, the Sub-Fund may be more volatile than more broadly diversified funds.
- Further information about risks can be found in the "Risk Information" section of the Prospectus.
