JPM US Short Duration Bond D (acc) - EUR (hedged) a Share Class of JPMorgan Funds – US Short Duration Bond Fund a Sub-Fund of JPMorgan Funds

LU0562248152

The management company is JPMorgan Asset Management (Europe) S.à r.l.

Objectives and Investment Policy

Investment Objective: The Sub-Fund aims to achieve a return in excess of US short duration bond markets by investing primarily in US investment grade debt securities, including asset-backed and mortgage-backed securities.

Investment Policy: At least 90% of the Sub-Fund's assets (excluding cash and cash equivalents) will be invested in investment grade short term debt securities issued or guaranteed by the US government or its agencies and by companies that are domiciled in, or carrying out the main part of their economic activity in, the US.

Debt securities will be rated investment grade at the time of purchase. However, as a result of rating downgrade, removal of rating or default of the issuer of such securities after purchase, the Sub-Fund may hold below investment grade or unrated debt securities to a limited extent.

The weighted average duration of the Sub-Fund's investments will generally not exceed three years and the remaining duration of each investment will generally not exceed five years at the time of purchase. The maturity of securities may be substantially longer than the periods stated above.

The Sub-Fund will invest a significant portion of its assets in mortgage-backed securities and asset-backed securities. The Sub-Fund's investments in asset-backed securities and mortgage-backed securities will be rated, at the time of

purchase, at least investment grade by Standard & Poor's or otherwise similarly rated by another independent rating agency.

The Sub-Fund may use financial derivative instruments for the purposes of hedging and efficient portfolio management.

This Share Class seeks to minimise the effect of currency fluctuations between the Reference Currency of the Sub-Fund (USD) and the Reference Currency of this Share Class (EUR).

Redemption and Dealing: Shares of the Sub-Fund may be redeemed on demand, with dealing normally on a daily basis.

Management Discretion: The Investment Manager has the discretion to buy and sell investments on behalf of the Sub-Fund within the limits of the Objective and Investment Policy.

Benchmark: The benchmark of the Share Class is Bloomberg Barclays US Government/Credit 1-3 Year Index (Total Return Gross) Hedged to EUR.

The benchmark is a point of reference against which the performance of the Share Class may be measured. The portfolio of the Sub-Fund may bear little resemblance to its benchmark.

Distribution Policy: This Share Class will not pay dividends.

---	---	---	---	---	---	---

The above rating is based on the historic volatility of the Net Asset Value of the Share Class over the last five years and may not be a reliable indication of the future risk profile of the Share Class.

The risk and reward category shown above is not guaranteed to remain unchanged and may change over time.

A Share Class with the lowest risk rating does not mean a risk-free investment.

Why is this Share Class in this category? This Share Class is classified in category 2 because its Net Asset Value has shown low fluctuations historically.

Other material risks:

- The value of your investment may fall as well as rise and you may get back less than you originally invested.

- The value of debt securities may change significantly depending on economic and interest rate conditions as well as the credit worthiness of the issuer. These risks are typically increased for below investment grade debt securities which may also be subject to higher volatility and lower liquidity than investment grade debt securities.
- Asset-backed and mortgage-backed securities may be highly illiquid, subject to adverse changes to interest rates and to the risk that the payment obligations relating to the underlying asset are not met.
- Movements in currency exchange rates can adversely affect the return of your investment. The currency hedging used to minimise the effect of currency fluctuations may not always be successful. Investors may have exposure to currencies other than the currency of their Share Class.
- Further information about risks can be found in "Appendix IV - Risk Factors" of the Prospectus.
