LUX IM - ESG GREEN ENERGY, a compartment of LUX IM

Class: E, Share: X (Accumulation) ISIN: LU2037070963

This SICAV is managed by BG FUND MANAGEMENT LUXEMBOURG S.A.

Objectives and investment policy

The Fund promotes, among other characteristics, environmental and social characteristics, provided that the target investments' issuers follow good governance practices, and qualifies under Article 8(1) of Regulation (EU) 2019/2088 on sustainability-related disclosure requirements in the financial services sector.

The Fund seeks to provide capital appreciation over the long term through exposure to the renewable energy sector. The Fund is managed actively and has no reference benchmark. The Fund essentially invests in equities issued by listed companies involved in the generation, transmission and distribution of renewable energy, as well as by producers of technologies and service providers related to renewable energy without any limitation in terms of country, currency and market capitalisation. Small and micro capitalisation companies may not represent more than 50% of Fund's net assets.

The investments are selected taking into account financial analysis and binding Environmental, Social and Governance ("ESG") criteria, based on a proprietary ESG rating system provided by an external advisor and ranging from 1 to 5 (5 being the best rating). The investment process excludes the companies potentially exposed to ESG controversies and/or in specific activities and focus essentially on the ones with an ESG rating equal or higher than 2.6 out of 5.

The Fund may invest in target funds, including exchange traded funds ("ETFs"), up to 30% of its net assets.

The Fund may use financial derivatives to protect its portfolio against unfavourable market fluctuations or currency fluctuations. The Fund may also use financial derivatives to reduce other risks or to produce more revenues.

The Fund is open-ended. You may redeem shares of the Fund on any Luxembourg business day.

The Fund has not designated a reference benchmark for the purpose of the Regulation (EU) 2019/2088.

The Share Class makes no dividend payment.

Risk and reward profile

This indicator represents the annual historical volatility of the Fund over a 5-year period. Its aim is to help investors understand the uncertainties attached to gains and losses that may have an impact on their investment.

The Fund's exposure to equity markets and to foreign currency risk explains its classification in this category.

Historical data such as that used to calculate the synthetic indicator cannot be considered as a reliable indication of the Fund's future risk profile.

The risk category associated with the Fund is not guaranteed and may change over time.

The lowest risk category does not mean "risk free".

Your initial investment is not guaranteed.

Significant risk(s) for the Fund not taken into account in this indicator include the following:

Credit Risk: The Fund is invested in securities whose credit rating may deteriorate as there is a risk that the issuer may fail to meet its contractual obligation. Should the credit rating of the issuer deteriorate, the value of the securities linked to that issuer may decrease.

Liquidity Risk: The Fund is invested in markets that may be affected by a decrease of liquidity. Such market conditions would impact the prices at which the Fund Manager opens and closes positions.

Counterparty Risk: The Fund may realise losses should a counterparty fail to meet its contractual obligation, especially in the case of derivatives traded Over-The-Counter (OTC).

Concentration Risk: To the extent that the Fund's investments are concentrated in a particular company, the Fund may be susceptible to losses due to adverse occurrences affecting that company.

Interest rate Risk: An increase in interest rates may cause the value of fixed-income securities held by the Fund to decline. Bond prices and yield have an inverse relationship, when the price of a bond falls the yield rises.

For more information about the risks of the Fund, please refer to the risk section of the prospectus.

Charges

The charges and commissions are used to cover the Fund's operating costs, including marketing and distribution of shares. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest
