

Key investor information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Monthly High Income Fund

A sub-fund of Ninety One Funds Series ii
managed by Ninety One Fund Managers UK Limited

Class R Accumulation shares in sterling
ISIN: GB00B8PLF315

Objectives and investment policy

The Fund aims to provide high income on a monthly basis.

The Fund invests around the world primarily in bonds (contracts to repay borrowed money which typically pay interest at fixed times) and related derivatives (financial contracts whose value is linked to the price of an underlying asset).

The Fund may invest in other assets such as cash, money market instruments (tradable securities where money can be invested for short periods), other funds (which may be managed by the Investment Manager, other companies in the same group as the Investment Manager or a third party) and derivatives.

Derivatives may be used for investment purposes (i.e. in order to achieve the Fund's investment objectives) or for efficient portfolio management purposes e.g. with the aim of either managing the Fund risks or reducing the costs of managing the Fund.

The Fund uses hedging (an investment technique which aims to protect the value of an investment against currency movements) to minimise any currency risk in sterling.

The Fund is actively managed. This means the Investment Manager is free to select investments with the aim of achieving the Fund's objectives.

The Fund uses the ML Global High Yield Constrained Index GBP Hedged Index for performance comparison and risk management.

The Fund does not seek to replicate the index. It will generally hold assets that are components of the index, but not in the same proportions, and it is allowed to hold assets which are not components of the index. The Fund will therefore generally look different from the index, and the Investment Manager will monitor performance differences.

The Investment Association £ High Yield average (as calculated by Morningstar using a peer group of broadly similar funds) is an additional measure by which you can compare the Fund's performance.

Any income due from your investment is reflected in the value of your shares rather than being paid out.

You can buy or sell shares in the Fund on any Dealing Day in the UK, as defined in the definitions section of the Ninety One Funds Series Omnibus prospectus.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within the short to medium term.

Risk and reward profile

Lower risk
Potentially lower rewards

This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean 'risk free'.

The value of your investment and any income from it can fall as well as rise and you are not certain of making profits; losses may be made.

The Fund appears towards the lower end of the Risk and Reward Indicator scale. This is because it invests in bonds whose returns tend to fluctuate more than those of cash funds but less than those of funds which invest in the shares of companies.

Risks that may not be fully captured by the Risk and Reward Indicator:

Default: There is a risk that the issuers of fixed income investments (e.g. bonds) may not be able to meet interest payments nor repay the money they have borrowed. The worse the credit quality of the issuer, the greater the risk of default and therefore investment loss.

Derivatives: The use of derivatives may increase overall risk by magnifying the effect of both gains and losses leading to large changes in value and potentially large financial loss. A counterparty to a derivative transaction may fail to meet its obligations which may also lead to a financial loss.

Government securities exposure: The Fund may invest more than 35% of its assets in securities issued or guaranteed by a permitted sovereign entity, as defined in the definitions section of the Fund's prospectus.

Interest rate: The value of fixed income investments (e.g. bonds) tends to decrease when interest rates rise.

Liquidity: There may be insufficient buyers or sellers of particular investments giving rise to delays in trading and being able to make settlements, and/or large fluctuations in value. This may lead to larger financial losses than might be anticipated.

The full list of the Fund's risks are contained in the appendices of the Ninety One Funds Series omnibus prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. The entry charge shown is the most you might pay, in some cases you might pay less. You can find out actual entry charges from your financial adviser.

The ongoing charges figure shown here is an estimate of the charges, as there has been a change to the charging structure. The Fund's annual report for each financial year will include detail on the exact charges made. The figure excludes any performance fee and portfolio transaction costs, except in the case of an entry or exit charge paid by the Fund when buying or selling units in another fund. Ongoing charges may vary from year to year.

For more information about charges, please see section 7 of the Ninety One Funds Series omnibus prospectus.

Past performance

Past performance is not a guide to future performance. The value of your investment and income from it may go down as well as up and you may not get back the amount you invested. The Fund does not track an index, any index shown is for illustrative purposes only.

The past performance shown in the chart takes account of all charges except the Fund's entry charge and the past performance is calculated in sterling.

The Fund was launched on 17 December 2001 and this share class on 2 January 2013.
