

# Key investor information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

# Global Equity Fund

A sub-fund of Ninety One Global Strategy Fund  
("Ninety One GSF")  
managed by Ninety One Luxembourg S.A.

Class I Accumulation shares in US dollars  
ISIN: LU0440695715

## Objectives and investment policy

The Fund aims to provide capital growth.  
The Fund invests around the world primarily in the shares of companies.  
The Fund may currently invest up to 10% of its value in mainland China.  
The Investment Manager may decide to increase this limit to 20% but will give investors prior written notice before doing so.  
Derivatives (financial contracts whose value is linked to the price of an underlying asset) may be used for efficient portfolio management purposes e.g. with the aim of either managing the Fund risks or reducing the costs of managing the Fund.  
The Fund is actively managed. This means the Investment Manager is free to select investments with the aim of achieving the Fund's objectives.  
The MSCI AC World Net Return Index is used for performance comparison and risk management.  
The Fund does not seek to replicate the index. It will generally hold assets that are components of the index, but not in the same proportions, and it is allowed to hold assets which are not components of the index. The Fund will therefore generally look different from the index, and the Investment Manager will monitor performance differences.  
Any income due from your investment is reflected in the value of your shares rather than being paid out.  
You can buy or sell shares in the Fund on any Business Day as defined in the definitions section of the prospectus.  
Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within the short to medium term.

## Risk and reward profile

This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean 'risk free'.  
The value of your investment and any income from it can fall as well as rise and you are not certain of making profits; losses may be made.  
The Fund appears towards the higher end of the Risk and Reward Indicator scale. This is because it invests in the shares of companies, whose values tend to fluctuate more widely.  
**Risks that may not be fully captured by the Risk and Reward Indicator:**  
**Currency exchange:** Changes in the relative values of different currencies may adversely affect the value of investments and any related income.  
**Derivatives:** The use of derivatives is not intended to increase the overall level of risk. However, the use of derivatives may still lead to large changes in value and includes the potential for large financial loss. A counterparty to a derivative transaction may fail to meet its obligations which may also lead to a financial loss.  
**Emerging market (inc. China):** These markets carry a higher risk of financial loss than more developed markets as they may have less developed legal, political, economic or other systems.  
**Equity investment:** The value of equities (e.g. shares) and equity-related investments may vary according to company profits and future prospects as well as more general market factors. In the event of a company default (e.g. insolvency), the owners of their equity rank last in terms of any financial payment from that company.  
The full list of Fund's risks are contained in the appendices of the Ninety One GSF prospectus.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. The entry charge shown is the most you might pay, in some cases you might pay less. You can find out actual entry charges from your financial adviser.

The ongoing charges figure is based on last year's expenses for the year ending 31 December 2019. The figure excludes any performance fee and portfolio transaction costs, except in the case of an entry or exit charge paid by the Fund when buying or selling units in another fund. Ongoing charges may vary from year to year.

For more information about charges, please see Appendix 1 of the Ninety One GSF prospectus.

### One-off charges taken before or after you invest

Entry charge 5.00%

Exit charge None

This is the maximum that might be taken out of your money before it is invested.

### Charges taken from the fund over a year

Ongoing charge 0.98%

### Charges taken from the fund under certain specific conditions

Performance fee None

## Past performance

Past performance is not a guide to future performance. The value of your investment and income from it may go down as well as up and you may not get back the amount you invested. The Fund does not track an index, any index shown is for illustrative purposes only.

The past performance shown in the chart takes account of all charges except the Fund's entry charge and the past performance is calculated in US dollars.

The Fund was launched on 25 January 1985 and this share class on 28 September 2012.
