

Key investor information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Asia Pacific Franchise Fund

A sub-fund of Ninety One Global Strategy Fund
("Ninety One GSF")
managed by Ninety One Luxembourg S.A.

Class I Accumulation shares in US dollars
ISIN: LU1734074757

Objectives and investment policy

The Fund aims to provide long-term capital growth with the potential for income. The Fund invests primarily in the shares of companies which are incorporated in and/or listed in, or derive a significant proportion of their revenue from, the Asia Pacific ex Japan region.

The Fund focuses investment on companies deemed by the Investment Manager to be of high quality i.e. companies which have provided sustainably high levels of return on invested capital and free cash flow (a company's cash earnings after its capital expenditures have been accounted for) which are typically associated with strong brands or franchises.

The Fund may invest up to 20% of its value in mainland China.

The Fund may invest in other assets such as cash, other funds (which may be managed by the Investment Manager, other companies in the same group as the Investment Manager or a third party) and derivatives (financial contracts whose value is linked to the price of an underlying asset).

Derivatives may be used for efficient portfolio management purposes e.g. with the aim of either managing the Fund risks or reducing the costs of managing the Fund. The Fund is actively managed. This means the Investment Manager is free to select investments with the aim of achieving the Fund's objectives.

The MSCI AC Asia Pacific ex Japan Net Return Index is used for performance comparison.

The Fund does not seek to replicate the index. It will generally hold assets that are components of the index, but not in the same proportions, and it is allowed to hold assets which are not components of the index. The assets of the Fund therefore may be very different from the index.

Any income due from your investment is reflected in the value of your shares rather than being paid out.

You can buy or sell shares in the Fund on any Business Day as defined in the definitions section of the prospectus.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within the short to medium term.

Risk and reward profile

This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean 'risk free'.

The value of your investment and any income from it can fall as well as rise and you are not certain of making profits; losses may be made.

The Fund appears towards the higher end of the Risk and Reward Indicator scale. This is because it invests in the shares of companies, whose values tend to fluctuate more widely.

Risks that may not be fully captured by the Risk and Reward Indicator:

Concentrated portfolio: The portfolio invests in a relatively small number of individual holdings. This may mean wider fluctuations in value than more broadly invested portfolios.

Currency exchange: Changes in the relative values of different currencies may adversely affect the value of investments and any related income.

Derivatives: The use of derivatives is not intended to increase the overall level of risk. However, the use of derivatives may still lead to large changes in value and includes the potential for large financial loss. A counterparty to a derivative transaction may fail to meet its obligations which may also lead to a financial loss.

Emerging market (inc. China): These markets carry a higher risk of financial loss than more developed markets as they may have less developed legal, political, economic or other systems.

Equity investment: The value of equities (e.g. shares) and equity-related investments may vary according to company profits and future prospects as well as more general market factors. In the event of a company default (e.g. insolvency), the owners of their equity rank last in terms of any financial payment from that company.

Geographic / Sector: Investments may be primarily concentrated in specific countries, geographical regions and/or industry sectors. This may mean that the resulting value may decrease whilst portfolios more broadly invested might grow. The full list of Fund's risks are contained in the appendices of the Ninety One GSF prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. The entry charge shown is the most you might pay, in some cases you might pay less. You can find out actual entry charges from your financial adviser.

The ongoing charges figure shown here is an estimate of the charges. The Fund's annual report for each financial year will include detail on the exact charges made. The figure excludes any performance fee and portfolio transaction costs, except in the case of an entry or exit charge paid by the Fund when buying or selling units in another fund. Ongoing charges may vary from year to year.

For more information about charges, please see Appendix 1 of the Ninety One GSF prospectus.

Past performance

Past performance is not a guide to future performance. The value of your investment and income from it may go down as well as up and you may not get back the amount you invested. The Fund does not track an index, any index shown is for illustrative purposes only.

The past performance shown in the chart takes account of all charges except the Fund's entry charge and the past performance is calculated in US dollars.

The Fund was launched on 23 January 2018.
