

HSBC Global Investment Funds - China Consumer Opportunities

Share Class AD

As at 31 August 2019

Investment Aim

The Fund aims to provide long-term total return (meaning capital growth and income) by investing in shares of companies set to benefit from growth in China's consumer economy. In normal market conditions, at least 90% of the Fund's assets are invested in shares (or securities that are similar to shares) of companies domiciled in, based in, or carry out business activities in, any country including both developed markets and Emerging Markets. Such companies have a higher market value – they are generally in the top 85% of each market. The Fund can invest in companies based in any country, including developed and emerging economies. The Fund's maximum exposure to China A-shares and China B-shares is 30% of its assets. The sub-fund may also invest up to 10% in eligible closed-ended Real Estate Investment Trusts ("REITs"). The Fund may invest up to 10% of its assets into other funds. See the Prospectus for a full description of the investment objectives and derivative usage.

Risk Disclosure

It is important to remember that the value of investments can go down as well as up and you may not get back the amount originally invested. Where overseas investments are held the rate of currency exchange may cause the value of such investments to go down as well as up. Investments in emerging markets are by their nature higher risk and potentially more volatile than those inherent in some established markets. This fund invests predominantly in one geographic area; therefore any decline in the economy of this area may affect the prices and value of the underlying assets. Stock market investments should be viewed as a medium to long term investment and should be held for at least five years. For a full list of risks, please refer to the Prospectus and KIID.
