

## Key investor information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

# US Dollar Money Fund

A sub-fund of Ninety One Global Strategy Fund  
("Ninety One GSF")  
managed by Ninety One Luxembourg S.A.

Class D Income shares in US dollars  
ISIN: LU0345758949

### Objectives and investment policy

The Fund aims to provide a US dollar income return at the rate available in the wholesale Eurocurrency market (the market in which currencies are borrowed and lent outside of the country in which those currencies are legal tender, e.g. a bank outside of the US borrowing or lending US dollars).

The Fund is a short-term, variable net asset value money market fund and while it aims to preserve capital, this is not guaranteed.

The Fund normally invests in bank deposits repayable within six months and money market instruments (tradable securities where money can be invested for short periods) with a lifespan of up to one year.

The Fund's investments are priced or hedged (an investment technique which aims to protect the value of an investment against currency movements) back into US dollars.

The Fund is actively managed. This means the Investment Manager is free to select investments with the aim of achieving the Fund's objectives. The LIBID1 Week USD is used for performance comparison.

The Fund cannot replicate the benchmark index (LIBID is an interbank lending rate). The Investment Manager is free to choose the investments of the Fund and these will not resemble the components of the benchmark index.

Any income due from your investment is paid out to you.

You can buy or sell shares in the Fund on any Business Day as defined in the definitions section of the prospectus.

### Risk and reward profile

**Lower risk**  
Potentially lower rewards

This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean 'risk free'.

The value of your investment and any income from it can fall as well as rise and you are not certain of making profits; losses may be made.

The Fund appears towards the lower end of the Risk and Reward Indicator scale.

This is because the Fund invests in money market instruments, whose returns do not tend to fluctuate widely.

#### Risks that may not be fully captured by the Risk and Reward Indicator:

**Default:** There is a risk that the issuers of fixed income investments (e.g. bonds) may not be able to meet interest payments nor repay the money they have borrowed. The worse the credit quality of the issuer, the greater the risk of default and therefore investment loss.

**Government securities exposure:** The Fund may invest up to 100% of its assets in securities issued or guaranteed by a permitted sovereign entity, as defined in the definitions section of the Fund's prospectus.

**Interest rate:** The value of fixed income investments (e.g. bonds) tends to decrease when interest rates rise.

**Money Market Funds:** These investments differ from deposits as the amount invested is not guaranteed; the value of investments may rise and fall. The Fund does not receive external support to help keep its value stable nor guarantee its liquidity, for example its investments can be easily converted to cash. The risk of loss is borne by the investor.

The full list of Fund's risks are contained in the appendices of the Ninety One GSF prospectus.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. The entry charge shown is the most you might pay, in some cases you might pay less. You can find out actual entry charges from your financial adviser.

The ongoing charges figure is based on last year's expenses for the year ending 31 December 2019. The figure excludes any performance fee and portfolio transaction costs, except in the case of an entry or exit charge paid by the Fund when buying or selling units in another fund. Ongoing charges may vary from year to year.

For more information about charges, please see Appendix 1 of the Ninety One GSF prospectus.

### One-off charges taken before or after you invest

Entry charge 0%

Exit charge None

This is the maximum that might be taken out of your money before it is invested.

### Charges taken from the fund over a year

Ongoing charge 0.76%

### Charges taken from the fund under certain specific conditions

Performance fee None

## Past performance

Past performance is not a guide to future performance. The value of your investment and income from it may go down as well as up and you may not get back the amount you invested. The Fund does not track an index, any index shown is for illustrative purposes only.

The past performance shown in the chart takes account of all charges except the Fund's entry charge and the past performance is calculated in US dollars.

The Fund was launched on 25 January 1985 and this share class on 2 September 2002.
