Investec
Asset Management

Investec
UK Alpha Fund

A sub-fund of Investec Global Strategy Fund ("IGSF")
managed by Investec Asset Management Luxembourg S.A.

Class JX Income shares in sterling
ISIN: LU1213241133

Objectives and investment policy

The Fund aims to provide income and long-term capital growth.

The Fund invests primarily in the shares of UK companies focussing on shares believed to offer above average opportunities for total returns (the combination of income and capital growth).

Derivatives (financial contracts whose value is linked to the price of an underlying asset) may be used for efficient portfolio management purposes e.g. with the aim of either managing the Fund risks or reducing the costs of managing the Fund.

The Fund is actively managed. This means the Investment Manager is free to select investments with the aim of achieving the Fund's objectives.

The Fund uses the FTSE All-Share Total Return Index for performance comparison.

The Fund does not seek to replicate the index. It will generally hold assets that are components of the index, but not in the same proportions, and it is allowed to hold assets which are not components of the index. The assets of the Fund therefore may be very different from the index.

Any income due from your investment is paid out to you annually.

You can buy or sell shares in the Fund on any Business Day in Luxembourg and the UK, as defined in the definitions section of the Investec Global Strategy Fund's prospectus.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within the short to medium term.

Risk and reward profile

This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean 'risk free'.

The value of your investment and any income from it can fall as well as rise and you are not certain of making profits; losses may be made.

The Fund appears towards the middle of the Risk and Reward Indicator scale. This is because it invests in the shares of companies, whose values tend to fluctuate more widely.

Risks that may not be fully captured by the Risk and Reward Indicator:

Derivatives: The use of derivatives is not intended to increase the overall level of risk. However, the use of derivatives may still lead to large changes in value and includes the potential for large financial loss. A counterparty to a derivative transaction may fail to meet its obligations which may also lead to a financial loss.

Equity investment: The value of equities (e.g. shares) and equity-related investments may vary according to company profits and future prospects as well as more general market factors. In the event of a company default (e.g. insolvency), the owners of their equity rank last in terms of any financial payment from that company.

Geographic / Sector: Investments may be primarily concentrated in specific countries, geographical regions and/or industry sectors. This may mean that the resulting value may decrease whilst portfolios more broadly invested might grow.

The full list of Fund's risks are contained in the appendices of the IGSF prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. The entry charge shown is the most you might pay, in some cases you might pay less. You can find out actual entry charges from your financial adviser.

The ongoing charges figure is based on last year's expenses for the year ending 31 December 2019. The figure excludes any performance fee and portfolio transaction costs, except in the case of an entry or exit charge paid by the Fund when buying or selling units in another fund. Ongoing charges may vary from year to year.

For more information about charges, please see Appendix 1 of the IGSF prospectus.
