

## Key investor information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

### LUX IM - ESG GENERALI INVESTMENTS DIVERSIFIED STRATEGY, a compartment of LUX IM

**Class: B, Share: X (Accumulation) ISIN: LU1732786832**

This SICAV is managed by BG FUND MANAGEMENT LUXEMBOURG S.A.

### Objectives and investment policy

The Fund promotes, among other characteristics, environmental and social characteristics, provided that the target investments' issuers follow good governance practices, and qualifies under Article 8(1) of Regulation (EU) 2019/2088 on sustainability-related disclosure requirements in the financial services sector.

The Fund seeks an increase of the value of your investment over a long term. The Fund is actively managed and it has no reference benchmark. The Fund essentially invests in stocks or/and in bonds - essentially quality bonds - without any limitation in terms of geographic, currency and industry allocation. Securities are selected taking into account profitability criteria as well as binding Environmental, Social Responsible and Governance criteria ("ESG"). The selection process is aimed at identifying the potential target investments according to different ESG criteria, based on the issuer's type (government or corporate) or sector of activity. Consequently an analysis based on internal and external information at the level of the sector and the company and on an internal ESG risk rating system ranging from 100 to 0 (0 being the best rating) will be carried out. The Investment process will exclude the companies involved in severe controversies and/or in specific activities and will focus on the most sustainable companies from an ESG perspective by excluding the 20% poorly-rated issuers in the investment universe with the aim to retain the ones that are most engaged to meet the ESG criteria.

Respectively, at any time, direct investments in stocks and bonds range from 60% to 100% and overall stock exposure from 60% to 100% of the Fund's net assets.

The Fund may also invest up to 30% of its net assets in other UCITS and UCIs including Exchange Traded Funds (ETFs).

The Fund may also invest in debt instruments issued by governments belonging to the Organization for Economic Cooperation and Development (OECD), by sovereign and supranational entities.

Exposure to assets denominated in currencies other than Euro will be hedged.

The Fund may use financial derivatives to protect its portfolio against unfavorable market, interest rate or currency fluctuations. The Fund may also use financial derivatives to reduce other risks or to produce more revenues.

The Fund is open-ended. You may redeem shares of the Fund on any Luxembourg business day.

The Fund has not designated a reference benchmark for the purpose of the Regulation (EU) 2019/2088.

The Share Class makes no dividend payment.

### Risk and reward profile

This indicator represents the annual historical volatility of the Fund over a 5-year period. Its aim is to help investors understand the uncertainties attached to gains and losses that may have an impact on their investment.

The Fund's diversified exposure to equity markets and to interest rate, credit and foreign currency risks explains its classification in this category.

Historical data such as that used to calculate the synthetic indicator cannot be considered as a reliable indication of the Fund's future risk profile.

The risk category associated with the Fund is not guaranteed and may change over time.

The lowest risk category does not mean "risk free".

Your initial investment is not guaranteed.

Significant risk(s) for the Fund not taken into account in this indicator include the following:

**Credit Risk:** The Fund is invested in securities whose credit rating may deteriorate as there is a risk that the issuer may fail to meet its contractual obligation. Should the credit rating of the issuer deteriorate, the value of the securities linked to that issuer may decrease.

**Liquidity Risk:** The Fund is invested in markets that may be affected by a decrease of liquidity. Such market conditions would impact the prices at which the Fund Manager opens and closes positions.

**Counterparty Risk:** The Fund may realise losses should a counterparty fail to meet its contractual obligation, especially in the case of derivatives traded Over-The-Counter (OTC).

**Concentration Risk:** To the extent that the Fund's investments are concentrated in a particular company, the Fund may be susceptible to losses due to adverse occurrences affecting that company.

**Interest rate Risk:** An increase in interest rates may cause the value of fixed-income securities held by the Fund to decline. Bond prices and yield have an inverse relationship, when the price of a bond falls the yield rises.

**Sustainability Risks:** Sustainability risks can arise from impacts of environmental and social factors on assets as well as from the corporate governance of the issuer of assets held by the Fund.

**ESG Investment Risk:** The integration of ESG criteria within the investment process may affect the Fund's performance and thus the Fund may perform differently compared to similar Funds without such focus.

For more information about the risks of the Fund, please refer to the risk section of the prospectus.

## Charges

The charges and commissions are used to cover the Fund's operating costs, including marketing and distribution of shares. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
The percentage shown is the maximum amount that can be paid out of your investment. Your financial advisor or distributor can inform you of the associated entry and exit charges.	
Charges taken from the Fund over a year	
Ongoing charges	1.46%
Charges taken from the Fund under specific conditions	
Performance fee: 15% of the yield from the Net Asset Value per share compared to the High Water Mark, defined as the highest Net Asset Value per share calculated over a rolling 12-months period. No performance fees for the Fund's last financial year.	

The entry and exit charges shown are maximum rates. In certain cases, the charges paid may be lower.

The indicated ongoing charges are an estimate based on the expected total amount of charges. This percentage may vary from year to year. It excludes performance fees, if applicable, and portfolio trade-related costs, with the exception of costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme.

Conversions of shares between different classes are not possible. You may convert all part of your shares of one compartment into shares of one or more other compartments. Please refer to the conversion sections of the prospectus for applicable situations and conditions.

For more information about Fund charges, please refer to the relevant parts of the prospectus, which is available at [www.bgfml.lu](http://www.bgfml.lu).

## Past performance

Information on past performance will be provided after the close of the first financial year.

The performance figures shown in the bar chart are not a reliable indication of future performance.

There is insufficient data to provide a useful indication of past performance to investors.

Fund creation date: 3 April 2018

Share class launch date: 20 July 2021

Past performance has been calculated in: Euro
