## GATEWAY TARGET BETA UCITS FUND a Sub-Fund of GATEWAY UCITS FUNDS PLC

Class R EUR ISIN: IE00BZCMZ811

Class R CHF ISIN: IE00BZCMZ928

The Manager of the Fund is Equity Trustees Fund Services (Ireland) Limited

### Objectives and investment policy

The investment objective of the Fund is to provide consistent positive returns by pursuing an investment strategy which seeks to provide returns similar to those of certain diversified hedge fund indices which invest in or have exposure to global equity and credit markets. For the avoidance of doubt the Fund does not intend to replicate or track such diversified hedge fund indices.

The Fund invests in a broad spectrum of exchange traded futures contracts on equity indices, fixed income securities and currencies and swaps on major credit default swaps indices. The Fund invests globally with a bias towards US and European markets.

In addition, the Fund also invests in cash, government debt securities, money market instruments, similar short term securities and instruments of first class credit rating issuers.

The Fund may also use currency forward contracts, futures or other financial derivative instruments to hedge currency risk of investments issued in a currency different from the base currency of the Fund.

Investors can buy, sell or switch shares daily by submitting an application to the Fund's administrator before 4 p.m. (Irish time) falling 2 business days prior to the relevant dealing date.

• **Recommendation:** This fund is appropriate for investors with a long-term investment horizon.

The Fund does not intend to pay a dividend.

**For full investment objective and policy information please refer to the prospectus.**

### Risk and reward profile

The Fund's risk level is classified as category 5, indicating a higher than average risk but with the potential for higher reward.

The Fund's investment objective is to pursue an absolute return strategy that seeks to provide returns similar to those of a diversified portfolio of hedge funds which invest in, or have exposure to global equity and credit markets through investment in a portfolio comprised primarily of exchange traded futures and index-based swaps.

The Fund will invest in a diversified portfolio of exchange traded futures contracts on equity indices, fixed income securities, currencies and swaps on major credit default swaps indices.

Historical data, such as is used in calculating the synthetic indicator, may not be reliable indication of the future risk profile of the Fund.

The risk and reward category shown is not guaranteed to remain unchanged and that the categorisation of the Fund may shift over time.

The lowest category does not mean a risk-free investment.

The Fund may also be exposed to the following risks which are not adequately taken into account by the risk indicator above:

• **Counterparty risk:** The Fund may invest in OTC contracts and may find itself exposed to risk arising from the solvency of its counterparties and their ability to respect the conditions of the contracts.

• **Liquidity Risk:** The Fund may not be able to sell an investment at the time and price that is most beneficial to the Fund and may be unable to raise cash to meet redemption requests as a result.

• **Credit risk:** The Fund may invest in fixed income derivatives or money markets. The Fund is therefore exposed to the risk that the credit institution may become unable to meet its financial obligations or declare bankruptcy.

• **Leverage:** The Fund may invest in derivatives with the intention of increasing potential gains, however this strategy also increases the exposure for potential losses.

## Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing the Fund. These charges reduce the potential growth of the investment.
