

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

ES River and Mercantile UK Equity High Alpha Fund

B Acc, ISIN: GB00B3D79W34

A sub-fund of the ES River and Mercantile Funds ICVC

Equity Trustees Fund Services Ltd is the Authorised Corporate Director of the Fund

Objectives and investment policy

The investment objective of the Fund is to grow the value of your investment (known as “capital growth”) in excess of the MSCI United Kingdom Investable Market Index (IMI) Net Total Return (the “Benchmark”) over a rolling 5 year period, after the deduction of all fees.

The Fund seeks to achieve its investment objective by investing at least 60% of its value in shares of UK companies (companies which are domiciled, incorporated, or have significant operations in the UK). Investment can be direct, or indirect, in shares (including common and preference shares), rights for shares, warrants, depositary receipts (securities issued by banks that represent company shares), investment trusts (including REITS) and collective investment schemes. In addition, up to 20% of the Fund may be invested in shares of companies which are not UK companies but which, at the time of investment, are listed in the UK. Investment can be direct or indirect as noted above. It is expected that at least 80% of the Fund will be invested in UK companies and companies which are listed in the UK. Up to 20% of the Fund may be invested in shares of overseas companies (companies which are not UK companies and which are not listed in the UK), excluding emerging markets, collective investment schemes and cash. Investment can be direct or indirect as noted above.

Investment in collective investment schemes (which includes exchange traded funds) can include those operated and/or managed by the ACD or the Investment Manager.

The Fund may use derivatives for the purposes of reducing risk or cost or for generating extra income or growth (known as “efficient portfolio management”). As an example, the Fund may use forward contracts for currency hedging with the intention of reducing the risk arising from currency exposures in a cost-effective way.

The Fund is actively managed, meaning the Investment Manager uses their expertise to pick investments to achieve the Fund’s objectives. The Investment Manager typically defines “high alpha” as, in normal market conditions, a performance of 3% above the Benchmark over a rolling 5 year period. However, this may not always be possible in all market conditions. The Investment Manager does not use this, or any other figure, as a target for performance. The Investment Manager will select shares for the Fund that fit the River and Mercantile PVT (Potential, Valuation and Timing) Investment Philosophy. This approach to investing has been in place since the PVT Team was launched in 2006. It looks for companies that are considered by the Investment Manager to have attractive “Potential” (the ability to grow shareholder value through increases in profits and cash), “Valuation” (the price of shares on the stock market is lower than the value the Investment Manager gives to the shares) and “Timing” (the extent to which analytical indicators are supportive of investing at the time of analysis).

The Fund will invest in a broad range of companies by industry sector and size and does not have to hold the same companies that are included in the Benchmark or in the same weights. However, where the Fund invests in companies which are included in the Benchmark the Fund’s exposure to any one company will not be more than 4% above or below the Benchmark’s exposure to that company. Exposure to any industry sector will not be more than 8% above or below the Benchmark’s exposure to that sector, measured at the sector level of GICS (Global Industry Classification Standard).

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund’s ranking on the Risk and Reward Indicator.

The Fund may not achieve its investment objective and/or you could lose money on your investment in the Fund.

The following risks are materially relevant to the fund but may not be adequately captured by the Risk and Reward Indicator, and may cause additional loss:

- Liquidity risk: securities in the fund may be sold below their valuation due to insufficient liquidity in the market.
- Derivative risk: Derivatives may be used to reduce the risk of the Fund, but may not always be effective and the Fund may still suffer a loss.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	5.25%*
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment.

*The current entry charge is 0% and if we wish to increase this charge then 60 days' notice will be provided.

Charges taken from the fund over a year

Ongoing charge	0.90%
----------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	None
-----------------	------

- The ongoing charges figure is based on the last year's expenses and may vary from year to year. It excludes the costs of buying or selling assets for the Fund (unless these assets are shares of another fund).
- The on-going charges figure is from audited Report & Accounts dated 31/03/2021. This figure may vary year on year. It excludes transaction costs charged to the fund such as broker's commission and local taxes of buying and selling securities in the underlying Fund.
- For more information about charges please see pages 48 to 53 of the Fund's Principal Prospectus.

Past Performance

- You should be aware that past performance is not a guide to future performance.
- Fund launch date: 28/11/2006.
- Share/unit class launch date: 20/10/2008.
- Performance is calculated in GBP.
- The graph shows full calendar year performance in GBP. Performance shown takes into account ongoing charges, but not entry fees, and is calculated in pounds sterling on a Net Asset Value basis with net dividends reinvested.
- MSCI makes no express or implied warranties or representations and shall have no liability whatsoever with respect to any MSCI data contained herein. The MSCI data may not be further redistributed or used as a basis for other indexes or any securities or financial products. This document is not approved, endorsed, reviewed or produced by MSCI. None of the MSCI data is intended to constitute investment advice or a recommendation to make (or refrain from making) any kind of investment decision and may not be relied on as such.
