Evenlode Global Dividend Fund (“the Fund”)

Class I Income GBP Shares
This is a sub fund of Evenlode ICAV, an Irish collective asset management vehicle.
ISIN: IE00BKT1BS84
Equity Trustees Fund Services (Ireland) Limited is the manager of the ICAV.

Objectives and investment policy

The investment objective of the Fund is to provide long-term total returns with an emphasis on income. The Fund will invest predominantly in equity securities of companies listed on exchanges in Recognised Markets, with the balance invested in cash (or near cash securities, including highly liquid securities consisting of certificates of deposits, and government and public securities with a maturity of less than one year), up to 10% in Collective Investment Schemes that are established as UCITS and eligible under the Regulations, and in derivatives for the purpose of efficient portfolio management from time to time. It is not intended that the Fund will hold more than 5% of its Net Asset Value in cash except in exceptional circumstances. The Fund aims to invest in a focused portfolio of shares offering a combination of high and growing cash-flows (to deliver both capital growth and dividend growth for the Fund) and low business risk. Investments in emerging markets generally will not exceed 10% of the Fund's total assets.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

- This Fund is ranked at 5 because funds of this type have experienced medium to high rises and falls in value in the past. Please note that even the lowest risk class can lose you money and that extreme market circumstances can mean you suffer severe losses in all cases. While the risk indicator takes into account the broader risk profile, the following risks are considered most relevant to this Fund:
- **Equity Securities:** Equities can lose value rapidly, and typically involve higher market risks than bonds, money market instruments or other debt instruments. Fluctuation in value may occur in response to activities of individual companies, the general market, economic conditions, or changes in currency exchange rates.
- **Concentration:** In certain conditons the Sub-Fund may invest in a relatively small number of securities, which may result in portfolio concentration in sectors, countries, or other groupings. These potential concentrations mean that a loss arising in a single investment may cause a proportionately greater loss in the Sub-Fund than if a larger number of investments were made.
- **Liquidity:** There is a risk that adverse market conditions may affect the Fund's ability to sell assets at the price the Fund would like, or the Fund may have to sell them at a loss.
- **Currency:** To the extent that a Sub-Fund holds assets that are denominated in currencies other than the base currency, any changes in currency exchange rates could reduce investment gains or income, or increase investment losses.
- **Emerging Markets:** Where a Sub-fund invests substantially in securities listed or traded in emerging markets, the performance of the Sub-fund may be more volatile than a fund that invests in securities traded in developed countries.
- For further risk information please see the Prospectus and the Fund Supplement.
