New Horizon Global Innovation Fund (the “Fund”)

CLASS D (USD) ISIN: IE000MRJHBY1 | CLASS D (CHF) ISIN: IE000S7EE123 | CLASS D (EUR) ISIN: IE000QJ79BQ5 |
CLASS D (GBP) ISIN: IE000KX08600

This is a Sub Fund of TC New Horizon ICAV, an open-ended investment company.
Equity Trustees Fund Services (Ireland) Limited is the UCITS Management Company of the Fund.

Objectives and investment policy

The investment objective of the Fund is to achieve long-term capital growth in US Dollars, through investment in global equities consisting of shares in issued by a range of companies which the Manager believes are Innovative Companies.

The Fund is actively managed and will seek to achieve its objective through investing in a long-only equity portfolio of shares issued by Innovative Companies on a global basis and which are listed on a Recognised Market. Only equities exhibiting positive ‘Value’ or ‘Growth’ metrics will be considered for investment and, to reduce risk, there will be an equal weighting to each factor, with the portfolio being rebalanced every two months.

The Manager will exclude any equities where market sentiment in respect of the issuer is unfavourable and/or negative independent analyst forecasts of accounting metrics. The Manager also takes concentration risk into account and at each rebalance the investment portfolio is expected to be comprised of between 32 – 40 different equities, split equally at that point between companies that exhibit ‘Value’ metrics and those that exhibit ‘Growth’ metrics. Equities with high volatility will also be excluded from the investible universe to further reduce risk.

The Manager’s bottom-up approach will involve an assessment of a target company’s fundamentals, an assessment of its future growth prospects, their confidence in management and whether the target company is cash generative. The target company’s fundamentals refer to those aspects of the company which can be thoroughly investigated by the Manager in order to identify the likely profitability of the company and the potential returns for investors in the Fund. Such fundamentals include the company’s business contracts, management team, previous performance, potential for expansion, etc.

Any income this share class generates will be reinvested to grow the value of your investment.

You can buy & sell shares on every day excluding bank holidays in Dublin or London.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.
For full investment objectives and policy details please refer to the Prospectus and the Fund Supplement.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund’s ranking on the Risk and Reward Indicator.

The Fund’s risk level is classified as category 6, indicating a higher than average risk but with the potential for higher reward. The high risk is attributed to the nature of the Fund’s investment. The category shown is not guaranteed to remain unchanged and may shift over time. Even the lowest category does not mean a risk-free investment.

The Fund may also be exposed to the following risks which are not adequately taken into account by the risk indicator above:

- **Equity Investment Risk:** Equities can lose value rapidly, and typically involve higher market risks than bonds, money market instruments or other debt instruments. Fluctuation in value may occur in response to activities of individual companies, the general market, economic conditions, or changes in currency exchange rates
- **Currency Risk and Unhedged Nature of the Fund:** The Base Currency of the Fund is USD and the investments of the Fund may be denominated in various currencies other than USD. Such investments are unhedged against the Base Currency (USD) which means that the values of such investments will fluctuate with USD exchange rates.

The price of the Fund can go down as well as up and is not guaranteed. Investors may not get back the amount invested. Past performance is not a guide to the future.

Certain securities may be difficult or impossible to sell at the time and the price that the seller would like. The seller may have to lower the price or sell other securities instead or forego an investment opportunity.
