The Manager of the Fund is Equity Trustees Fund Services (Ireland) Limited

Objectives and investment policy

The investment objective of the Fund is to achieve a high and secure dividend yield on its portfolio and to realise long-term growth in the capital value of its net assets for the benefit of investors while taking care to preserve capital.

For the purposes of investment, economic infrastructure companies are those that own and operate assets which are essential to the functioning of developed economies and to economic development and growth, notably transportation-related assets such as:

- Roads
- Railways
- Ports
- Airports
- Utilities*

*Utilities comprise a substantial proportion of the infrastructure companies of the Fund's net assets, e.g. the production of electricity from renewable sources; the transport, storage and distribution of gas; the abstraction, treatment and supply of water and the treatment of waste water; and the provision of environmental services such as recycling and waste management.

The Fund is categorised as an Article 8 product for the purposes of Sustainable Finance Disclosure Regulation ("SFDR"), meaning it promotes environmental and/or social characteristics.

The portfolio construction process restricts investments to companies that align with certain of the Manager's Sustainable Investment Themes.

Specifically this Fund invests around three Sustainable Investment Themes, "Electrification", "Environmental Services", and "Transportation Infrastructure".

The Fund's assets will be primarily invested in the equity and equity-related securities of economic infrastructure companies in developed countries, although up to 10% of the Fund's net assets may be comprised of investments in debt securities. The Fund may invest up to 20% of its net assets in cash and cash-equivalents such as high-quality, short-term debt securities (issuances with less than 12 months to maturity) and money market instruments, including treasury bills, corporate commercial paper and bank certificates of deposit (i) for temporary defensive purposes in response to adverse market, economic or political conditions and (ii) to retain flexibility in meeting redemptions, paying expenses, and identifying and assessing investment opportunities.

The Fund is actively managed which means that the Sub-Investment Manager has discretion over the composition of the Fund's portfolio, subject to the Fund's investment objective and policy. The Fund uses the S&P Global Infrastructure Index for comparison purposes in reporting performance.

This Fund is appropriate for investors seeking long-term capital appreciation who are prepared to accept moderate to high volatility and may not be appropriate for investors who plan to withdraw their money within 5 years.

The Sub-Fund does not intend to pay a dividend.

You can buy & sell shares on every day excluding bank holidays in Dublin, London, New York, China and Japan

Risk and reward profile

The indicator above indicates the position of the Fund on a standard risk/reward category scale.

The risk/return indicator suggests the relationship between risk and potential returns when investing in the Fund.

The Fund's risk level is classified as category 6, indicating a higher than average risk but with the potential for higher reward given that the focus is on the Target Sectors. The Fund is expected to have a high volatility due to its investment policy.

Historical data, such as is used in calculating the synthetic indicator, may not be a reliable indication of the future risk profile of the Fund.

The risk and reward category shown is not guaranteed to remain unchanged and the categorisation of the Fund may shift over time.

The lowest category does not mean a risk-free investment.

The following are some of the risks associated with the fund, investors are encouraged to read the supplement which details all of the risks associated with investing in the fund:

• **Portfolio Volatility Risk:** The value of the Fund's portfolio may decrease if the value of financial instruments traded by the Sub-Investment Manager decrease. The value of the Fund's portfolio could also decrease if the overall market declines.

• **Market Risk:** The Fund is affected by general economic and market conditions, such as interest rates, availability of credit, inflation rates, economic uncertainty, changes in laws, trade barriers, currency exchange controls and national and international political circumstances. These factors may affect the level and volatility of the price of securities and the liquidity of the Fund's investments. To note markets may be disrupted from time to time.

• **Operational Risk:** The Fund relies heavily on its financial, accounting and other data processing systems. There is a risk the systems may not be able to accommodate a high volume of transactions. There is also a risk of mistakes in the confirmation or settlement of transactions. The Fund's success will depend upon the ability of the Sub-Investment Manager to implement its investment policy and strategy.

• **Liquidity Risk:** The Fund may not be able to sell an investment at the time and price that is most beneficial to the Fund and may be unable to raise cash to meet redemption requests as a result.
