ES AllianceBernstein Europe (Ex UK) Equity Fund ("the Fund")

F Income (GBP), ISIN: GB00BJMHLL91
A sub-fund of the ES AllianceBernstein UK OEIC, an open-ended Investment Company
Equity Trustees Fund Services Ltd is the Authorised Corporate Director of the Fund

Objectives and investment policy

Investment Objective:

To achieve an increase in the value of its investment over a rolling 5 year period after the deduction of all fees through an actively managed, diversified portfolio of shares in European (excluding UK) companies.

Investment policy:

The Sub-Fund seeks to meet its investment objective by investing at least 80% of the Sub-Fund's total value in shares of European (excluding UK) companies. A "European company" means any company that is organized in or has substantial business activities in Europe. Investment can be direct or indirectly in equity related securities. Indirect exposure may be achieved by investing up to 10% of the Sub-Fund's value in Collective Investment Schemes, which may include other funds managed by the Investment Manager or its affiliates.

The Sub-Fund is actively managed meaning the Investment Manager uses their expertise to select investments to achieve the Sub-Fund's objectives.

The Sub-Fund will be diversified (investing in at least 30 companies) and the Investment Manager's investment decisions are not restricted to any specific industry sector or company size,

When selecting which companies to invest in and how much, the Investment Manager uses a combination of in-depth research (to develop a view on the ability of a company to meet return targets), an assessment of the downside risks (to estimate a company's potential to decline in value if market conditions change) and the company's contribution to the portfolio's overall risk exposures.

The Investment Manager will include, as part of its overall investment process, Environmental, Social, and Governance ("ESG") factors when considering whether or not to invest in or sell particular shares. The Investment Manager is not restricted by the investment policy from holding a particular company, unless the company is identified in accordance with the Sub-Fund's Exclusion Policy as stated in the prospectus.

The Investment Manager engages with companies as part of their fundamental research process and to take an active stewardship role by voting in relation to shares held by the Sub-Fund once it has invested

Although the Sub-Fund name states '(Ex UK)', and in-line with the Sub-Fund's Investment policy, the Sub-Fund may invest in shares of UK companies to achieve its Investment objective. At all times the Sub-Fund's investment into UK companies will not exceed 5% of the Sub-Fund's net assets.

The Sub-Fund may also invest up to 20% of its value in money market instruments, deposits, cash and near cash.

The Sub-Fund may also use derivatives for investment, efficient portfolio management or hedging purposes. Use of derivatives for investment purposes are limited to currency forwards used to gain exposure to European (ex UK) currencies.

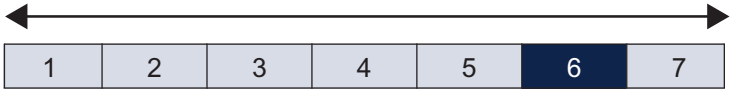

Any investment in derivatives for efficient portfolio management and investment purposes, is not intended to increase the Sub-Fund's risk profile.

Please refer to the prospectus for the full investment policy and objective.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards, Lower risk — **Typically higher rewards, Higher risk**

- This Fund is ranked at 6 because Funds of this type have experienced medium to high rises and falls in value in the past. The risk and reward score is based on past performance and calculated in accordance with European legislation. It may not be a reliable indication of the future risk profile. The risk and reward score is not guaranteed and may change over time. The lowest category does not mean risk free. While the risk indicator takes into account the broader risk profile, the following risks are considered most relevant to this Fund:
- **Equity Securities:** Equities can lose value rapidly, and typically involve higher market risks than bonds, money market instruments or other debt instruments. Fluctuation in value may occur in response to activities of individual companies, the general market, economic conditions, or changes in currency exchange rates.
- **Concentration:** In certain conditions the Sub-Fund may invest in a relatively small number of securities, which may result in portfolio concentration in sectors, countries, or other groupings. These potential concentrations mean that a loss arising in a single investment may cause a proportionately greater loss in the Sub-Fund than if a larger number of investments were made.
- **Liquidity:** There is a risk that adverse market conditions may affect the Fund's ability to sell assets at the price the Fund would like, or the Fund may have to sell them at a loss.
- **Currency:** To the extent that a Sub-Fund holds assets that are denominated in currencies other than the base currency, any changes in currency exchange rates could reduce investment gains or income, or increase investment losses.
- **Country:** In certain countries, there are risks associated with custody and counterparties that are higher than in developed countries.
- **ESG Investing:** The Fund may use certain ESG criteria in their investment strategies. This may limit the types and number of investment opportunities available and, as a result, the Fund may underperform in relation to other funds that do not have an ESG focus.
