The indicator above indicates the position of the Fund on a standard risk/reward category scale.

The risk/return indicator suggests the relationship between risk and potential returns when investing in the Fund.

The Fund's risk level is classified as category 5, indicating a higher than average risk but with the potential for higher reward. The high risk is attributed to the nature of the Fund's investment.

Historical data, such as is used in calculating the synthetic indicator, may not be a reliable indication of the future risk profile of the Fund.

The risk and reward category shown is not guaranteed to remain unchanged and the categorisation of the Fund may shift over time.

The lowest category does not mean a risk-free investment.

The Fund may also be exposed to the following risks which are not adequately taken into account by the risk indicator above:
