

# HSBC Global Investment Funds - Global Macro

Share Class M1C

As at 28 February 2015

## Investment Aim

The aim is to provide stable growth in the value of your investment over time, above that of the fund's benchmark, independent of how different types of investments perform. The fund will hold cash in any currency, shares in companies and debt issued by companies or governments from any country. The fund will mainly use derivatives to meet its objective. The fund may also use derivatives to sell exposure to shares and debt issued by companies and governments that the fund does not hold (short selling). The fund does not track a benchmark. Consideration may be given to a reference benchmark when selecting investments.

## Risk Disclosure

It is important to remember that the value of investments can go down as well as up and you may not get back the amount originally invested. Where overseas investments are held the rate of currency exchange may cause the value of such investments to go down as well as up. There are additional risks associated with specific alternative investments within the portfolios; these investments may be less readily realisable than others and it may therefore be difficult to sell in a timely manner at a reasonable price or to obtain reliable information about their value; there may also be greater potential for significant price movements. Stock market investments should be viewed as a medium to long term investment and should be held for at least three years. For a full list of risks, please refer to the prospectus and KIID.
