

HSBC Global Investment Funds - Taiwan Equity

Share Class AC

As at 28 February 2015

Investment Aim

The aim is to provide growth in the value of your investment over time. The fund will mostly hold a mix of shares in any size companies in Taiwan. It will also hold shares in companies, from any country, which carry out most of their business in Taiwan. The fund does not track a benchmark. Consideration may be given to a reference benchmark when selecting investments.

Risk Disclosure

It is important to remember that the value of investments can go down as well as up and you may not get back the amount originally invested. Where overseas investments are held the rate of currency exchange may cause the value of such investments to go down as well as up. Investments in emerging markets are by their nature higher risk and potentially more volatile than those inherent in some established markets. This sub-fund invests predominantly in one geographic area; therefore any decline in the economy of this area may affect the prices and value of the underlying assets. Stock market investments should be viewed as a medium to long term investment and should be held for at least five years. For a full list of risks, please refer to the prospectus and KIID.
