

# HSBC Global Investment Funds - Euro Credit Bond

Share Class AC

As at 28 February 2015

## Investment Aim

The aim is to provide growth and income on your investment over time. The fund will mostly hold a mix of high quality debt issued by companies valued in Euro, but may also hold debt issued by governments. The fund may use derivatives to manage interest and credit risks, gain exposure to currencies, improve returns and help meet the fund's objective. The fund does not track a benchmark. Consideration may be given to a reference benchmark when selecting investments.

## Risk Disclosure

It is important to remember that the value of investments can go down as well as up and you may not get back the amount originally invested. Where overseas investments are held the rate of currency exchange may cause the value of such investments to go down as well as up. The performance of bonds, gilts and other fixed interest securities tends to be less volatile than those of shares of companies (equities). However there is a risk that the capital value of these may be reduced if interest rates go up. Stock market investments should be viewed as a medium to long term investment and should be held for at least three years. For a full list of risks, please refer to the prospectus and KIID.
