Global Multi-Asset Sustainable Growth Fund

A sub-fund of Ninety One Global Strategy Fund ("Ninety One GSF")
managed by Ninety One Luxembourg S.A.

Class S Accumulation shares in US dollars
ISIN: LU0987175014

Objectives and investment policy

The Fund aims to provide real returns (through a combination of capital growth and income) measured in US dollars. The Fund targets a return of US Consumer Price Index (CPI, a measure of inflation) +4% (gross of fees) per annum over rolling 5-year periods.

The Fund promotes environmental and /or social characteristics by investing in companies and countries considered by the Investment Manager as having policies, operations and/or business models that aim to minimise their harmful effects on society and the environment, or whose products and/or services seek to benefit society and the environment.

The Fund invests around the world in a broad range of assets including: the shares of companies, bonds (contracts to repay borrowed money which typically pay interest at fixed times), money market instruments (types of tradable securities where cash can be deposited for short periods), cash or near cash, deposits, alternative assets (such as exposure to commodities, property and infrastructure) and units or shares in other funds (which may be managed by the Investment Manager, one of its affiliates or a third party).

Bonds (or similar debt-based assets) may be issued by any issuer e.g. governments or companies.

Investment Manager seeks to invests in companies that follow good governance practices (e.g. with respect to sound management and company board, corporate culture, capital allocation and remuneration policies).

The Investment Manager uses a consistent approach on an ongoing basis to assess the environmental and social characteristics of companies and countries using a variety of qualitative information and available data, for example, investigating carbon emissions goals, biodiversity and ecosystem preservation practices, availability of human capital training programmes, supply chain management practices and inclusive growth policies, and / or the effect that products and services have on addressing environmental and social challenges such as climate change, education and healthcare.

The Fund may invest in bonds issued inside Mainland China on any eligible market. The Fund may invest in shares issued by Mainland China companies, including B shares, H shares and China A shares. The Fund may invest up to 30% of its value in mainland China. The Fund may invest up to 25% of its value in frontier markets.

Derivatives (financial contracts whose value is linked to the price of an underlying asset) may be used for investment purposes (i.e. in order to achieve the Fund's investment objectives) or for efficient portfolio management purposes e.g. with the aim of either managing the Fund risks or reducing the costs of managing the Fund.

The Fund is actively managed. This means the Investment Manager is free to select investments with the aim of achieving the Fund's objectives.

The Fund cannot replicate the target benchmark index (CPI consists of the prices of a shopping basket of consumer goods and services). The Investment Manager is free to choose the investments of the Fund and these will not resemble the components of the benchmark index.

The Investment Manager may at times utilise global equities (proxied by the MSCI All Country World Total Return Net Index), global government bonds (proxied by the JPM GBI Broad Unhedged USD Index), or a combination of both, as an ancillary comparator to measure the risk, return or yield characteristics of the Fund.

Any income due from your investment is reflected in the value of your shares rather than being paid out.

You can typically buy or sell shares in the Fund on any business day.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean 'risk free'.

The value of your investment and any income from it can fall as well as rise and you are not certain of making profits; losses may be made.

The Fund appears towards the middle of the Risk and Reward Indicator scale. This is because the mix of assets the Fund invests in, tends to produce returns which fluctuate more than those of cash funds but less than those of funds which solely invest in the shares of companies.

Risks that may not be fully captured by the Risk and Reward Indicator:

Currency exchange: Changes in the relative values of different currencies may adversely affect the value of investments and any related income.

Default: There is a risk that the issuers of fixed income investments (e.g. bonds) may not be able to meet interest payments nor repay the money they have borrowed. The worse the credit quality of the issuer, the greater the risk of default and therefore investment loss.

Derivatives: The use of derivatives may increase overall risk by magnifying the effect of both gains and losses leading to large changes in value and potentially large financial loss. A counterparty to a derivative transaction may fail to meet its obligations which may also lead to a financial loss.

Emerging market (inc. China): These markets carry a higher risk of financial loss than more developed markets as they may have less developed legal, political, economic or other systems.

Equity investment: The value of equities (e.g. shares) and equity-related investments may vary according to company profits and future prospects as well as more general market factors. In the event of a company default (e.g. insolvency), the owners of their equity rank last in terms of any financial payment from that company.

Government securities exposure: The Fund may invest more than 35% of its assets in securities issued or guaranteed by a permitted sovereign entity, as defined in the definitions section of the Fund's prospectus.

Interest rate: The value of fixed income investments (e.g. bonds) tends to decrease when interest rates rise.

Sustainable Strategies: Sustainable, impact or other sustainability-focused portfolios consider specific factors related to their strategies in assessing and selecting investments. As a result, they will exclude certain industries and companies that do not meet their criteria. This may result in their portfolios being substantially different from broader benchmarks or investment universes, which could in turn result in relative investment performance deviating significantly from the performance of the broader market.

The full list of Fund risks are contained in the appendices of the Ninety One GSF prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry charge shown is the most you might pay, in some cases you might pay less.

You can find out actual entry charges from your financial adviser.

The ongoing charges figure is based on last year's expenses for the year ending 31 December 2020. The figure excludes any performance fee and portfolio transaction costs, except in the case of an entry or exit charge paid by the Fund when buying or selling units in another fund. Ongoing charges may vary from year to year.

For more information about charges, please see Appendix 1 of the Ninety One GSF prospectus.
