LUX IM - ESG AMUNDI SUSTAINABLE ALPHA, a compartment of LUX IM

Class: H, Share: X (Accumulation) ISIN: LU1881777194

This SICAV is managed by BG FUND MANAGEMENT LUXEMBOURG S.A.

Objectives and investment policy

The Fund promotes, among other characteristics, environmental and social characteristics, provided that the target investments' issuers follow good governance practices, and qualifies under Article 8(1) of Regulation (EU) 2019/2088 on sustainability-related disclosure requirements in the financial services sector.

The Fund seeks to provide capital growth over the medium to long term through a flexible exposure to multiple asset classes. The Fund is actively managed and it has no reference benchmark. The investments are selected taking into account profitability criteria as well as Environmental, Social Responsible and Governance criteria ("ESG") in accordance with the ESG policy available at :

<http://about.amundi.com/A-committed-player/Developing-responsible-finance>, by measuring the ESG performance of the target issuers through the use of an internal ESG rating, ranging from A to G (G being the worst score). The Investment process will exclude the companies involved in severe ESG controversies and/or in specific activities and will focus on the ones presenting best in class or strongly improving ESG dimensions within their sector of activity, pursuing an average ESG rating above D.

The Fund will invest in bonds, stocks and short term debt instruments issued by listed companies or governments without any currency, industry, geographic limitation.

Exposure to emerging markets will not represent more than 15% of the Fund's net assets.

The Fund may also invest up to 30% of its net assets in target funds including Exchange Traded Funds (ETFs). The equity exposure will not exceed 60% of the Fund's net assets.

The Fund will not invest directly in securitized instruments including mortgage, asset backed securities (MBS / ABS), collateralized loan obligations (CLOs), collateralized mortgage obligations (CMOs) and CoCos.

The Fund may use financial derivatives to protect its portfolio against unfavorable market, interest rate or currency fluctuations. The Fund may also use financial derivatives to reduce other risks or to produce more revenues.

The Fund is open-ended. You may redeem shares of the Fund on any Luxembourg business day.

The Fund has not designated a reference benchmark for the purpose of the Regulation (EU) 2019/2088.

The Share Class makes no dividend payment.

Risk and reward profile

This indicator represents the annual historical volatility of the Fund over a 5-year period. Its aim is to help investors understand the uncertainties attached to gains and losses that may have an impact on their investment.

The Fund's diversified exposure to equity markets and to interest rate, credit and foreign currency risks explains its classification in this category.

Historical data such as that used to calculate the synthetic indicator cannot be considered as a reliable indication of the Fund's future risk profile.

The risk category associated with the Fund is not guaranteed and may change over time.

The lowest risk category does not mean "risk free".

Your initial investment is not guaranteed.

Significant risk(s) for the Fund not taken into account in this indicator include the following:

Credit Risk: The Fund is invested in securities whose credit rating may deteriorate as there is a risk that the issuer may fail to meet its contractual obligation. Should the credit rating of the issuer deteriorate, the value of the securities linked to that issuer may decrease.

Counterparty Risk: The Fund may realise losses should a counterparty fail to meet its contractual obligation, especially in the case of derivatives traded Over-The-Counter (OTC).

Concentration Risk: To the extent that the Fund's investments are concentrated in a particular company, the Fund may be susceptible to losses due to adverse occurrences affecting that company.

Emerging market Risk: The Fund invests in developing overseas markets which carry a higher risk than investing in larger established markets. Investments in emerging markets are likely to experience greater rises and falls in value and there may be trading problems due to a lack of efficiency, legal supervision and/or liquidity.

Interest rate Risk: An increase in interest rates may cause the value of fixed-income securities held by the Fund to decline. Bond prices and yield have an inverse relationship, when the price of a bond falls the yield rises.

Sustainability Risks: sustainability risks can arise from impacts of environmental and social factors on assets as well as from the corporate governance of the issuer of assets held by the Fund.

ESG Investment Risk: the integration of ESG criteria within the investment process may affect the Fund's performance and thus the Fund may perform differently compared to similar Funds without such focus.

For more information about the risks of the Fund, please refer to the risk section of the prospectus.
