The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Emerging Markets Local Currency Debt Opportunities Fund

A sub-fund of Ninety One Fund Series i managed by Ninety One Fund Managers UK Limited

Class S Accumulation shares in US dollars
ISIN: GBO0BM9C7X26

Objectives and investment policy

The Fund aims to provide income and capital growth (to grow the value of your investment) over at least 5 years.

The Fund invests primarily (at least two-thirds) in bonds (or similar debt-based assets) issued by emerging market borrowers or borrowers who have significant economic exposure to emerging markets (countries that have less developed economies) and in related derivatives (financial contracts whose value is linked to the price of such bonds (or similar debt-based assets)).

These bonds (or similar debt-based assets) will be denominated in local currencies (the currency of the issuing country) or hard currencies (globally traded major currencies). They may have any credit rating or be unrated and may be issued by any issuer e.g. governments or companies. However, the Fund's focus will be on government and government-related bonds (or similar debt-based assets).

The Fund may invest no more than 5% of its assets in aggregate in any combination of the following:

- i. any securities and money market instruments issued or guaranteed by the US government (or by any person controlled or supervised by the US government) ("US Government Securities");
- ii. any option based on US Government Securities;
- iii. any money market fund or other investment product with investment in US Government Securities as its primary investment strategy; or
- iv. any repurchase agreement supported by US Government Securities collateral (as security in support of such agreements).

The Fund may not directly or indirectly invest in more than 5% of the securities in issue of any one entity or body.

Investment opportunities are identified using in-depth analysis and research on individual borrowers and macroeconomic research (based on the view of the economy as a whole).

The Fund may also invest in other transferable securities, money market instruments, cash or near cash, deposits, up to 10% in units or shares in other funds (which may be managed by a Ninety One group company, or a third party) and derivatives. Derivatives may be used for investment purposes and/or managing the Fund in a way that is designed to reduce risk or cost and/or generate income or growth with a low level of risk.

The Fund is actively managed. This means the Investment Manager is free to select investments with the aim of achieving the Fund's objectives. The JPMorgan GBI-EM Global Diversified Index is used for performance comparison and risk management. The Fund does not seek to replicate the index.

Any income due from your investment is reflected in the value of your shares rather than being paid out.

You can typically buy or sell shares in the Fund on any business day.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and reward profile

This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean 'risk free'.

The value of your investment and any income from it can fall as well as rise and you are not certain of making profits; losses may be made.

The Fund appears towards the middle of the Risk and Reward Indicator scale. This is because it invests in bonds whose returns tend to fluctuate more than those of cash funds but less than those of funds which invest in the shares of companies.

Risks that may not be fully captured by the Risk and Reward Indicator:

Currency exchange: Changes in the relative values of different currencies may adversely affect the value of investments and any related income.

Default: There is a risk that the issuers of fixed income investments (e.g. bonds) may not be able to meet interest payments nor repay the money they have borrowed. The worse the credit quality of the issuer, the greater the risk of default and therefore investment loss.

Derivatives: The use of derivatives may increase overall risk by magnifying the effect of both gains and losses leading to large changes in value and potentially large financial loss. A counterparty to a derivative transaction may fail to meet its obligations which may also lead to a financial loss.

Emerging market (inc. China): These markets carry a higher risk of financial loss than more developed markets as they may have less developed legal, political, economic or other systems.

Interest rate: The value of fixed income investments (e.g. bonds) tends to decrease when interest rates rise.

The full list of Fund risks are contained in the appendices of the Ninety One Funds Series omnibus prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry charge shown is the most you might pay, in some cases you might pay less.

You can find out actual entry charges from your financial adviser.

The ongoing charges figure shown here is an estimate of the charges. The Fund's annual report for each financial year will include detail on the exact charges made. The figure excludes any performance fee and portfolio transaction costs, except in the case of an entry or exit charge paid by the Fund when buying or selling units in another fund. Ongoing charges may vary from year to year.

For more information about charges, please see section 7 of the Ninety One Funds Series omnibus prospectus.
